

DENTAL UNIT HYGIENE

Water decontamination

No to Biofilm and limestone

OUR SERVICES:

✓ PREVENTION AND CONTROL OF WATER RISK

We verify the presence of Biofilm and limestone by carrying out a test to determine bacterial activity

✓ Bacterial proliferation and the presence of biofilms are proven inside the water pipes of the dental unit.

WE DECONTAMINATE AND SANITIZE YOUR UNIT

• Step by Step

1- Through a water by-pass we disconnect the water mains

2- Insertion of disinfectant for BIOFILM elimination

Green&Clean BR - Metasys

3- Insertion of disinfectant based on:

Peracetic Acid 1%, Hydrogen Peroxide, Acetic Acid, **Proteoxide Dial - Proteos**

4- Installation of the disinfection system (not included in the decontamination package)
